

## T500 Net Motorised Divider

### Application:

Appropriate Size	20-2000m <sup>2</sup> (WxH)
Sound Traps	No
Door Opening	Optional extra
Valances to Ceiling	Optional extra
Collection	In ceiling
Raised Position	Straight, angled or Curved

### Curtain:

Curtain Material	Reinforced PVC
Joints	Welded
Flame Protection	DIN 4102 B2 SIS 650082
Tear Resistance	300N when ripping
Tensile Strength	3000N / 5cm

### Weight:

Curtain	0.7 kg / m <sup>2</sup> per side
Total	0.75 kg / m <sup>2</sup>
Motor	100 - 250 kg

### Reference Sites

Emirates Arena, Glasgow
Ranheim Athletics Hall, Norway

An extremely flexible partitioning or wall protection solution for sports halls and indoor arenas. The system can be installed as a mesh barrier along the wall or as a freely hanging mesh partition.

The net can be collected in the ceiling in a curved or angled position to match roof profiles and has small installation dimensions.

The wall consists of a tied nylon mesh. The mesh size and colour can be tailored to suit individual client requirements.

An electrical mechanism lifts the curtain wall for collection in the ceiling. As with all our motorised walls, the T500 Net comes with the required electrical automation and lockable key switch and spring loaded DIN cylinder.

The system is also suitable for use within Swimming Pool environments, for example as ball-stop netting for water polo.
