

**Product Description:**

Foldable Seating - Fixed

**Product Code:**

SEA-FOL-F

Rantzows foldable seating is a unique product that enables flexible solutions in several ways. The seating system can be placed in any room requiring spectator seating, it is easy to fold away by one person manually due to the built-in gas springs, it requires minimum space when not being used and it is made of robust steel that provides durable and stable seating. Furthermore, when not in use a practical rebound surface is left. The careful attention to detail makes the seating safe as well as practical.

European patent and Swedish design. Easily raised and lowered. Maximum depth of just 35cm when raised. Stores 16 seats in only 0.6m<sup>2</sup>. Also available in a portable version.

Stairs, railing, side protection, motorized operation when raising/lowering the seating and colour of the steel construction can be chosen as options. Padded 'seats' can also be added as an option.

The system allows for panels to be attached to match the wall finish surrounding the seating, allowing the system to 'blend-in' seamlessly with the wall when in the 'closed' position. Likewise, ventilation systems can also be incorporated into the system by the customer.

The seating has four different standard depths, from two to five rows. The system is divided into sections, with the standard section size being 2020mm, which can seat four people on each row.

**Dimensions:**

*Between 2 and 5 rows depending on model. Depth (Open): 1255mm - 3250mm; Depth (Closed): 210mm - 400mm*

**Colour:**
