

**Product Description:**

Flip Down Tiered Seating

**Product Code:**

SEA-T-FLIP

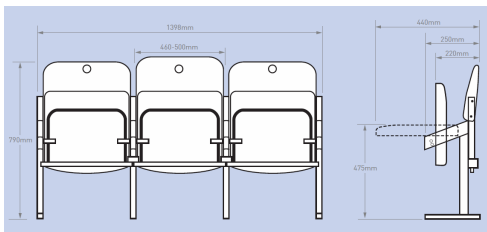

Tough, weather resistant polypropylene seats and backs provides exceptional value for money for large scale venues and is the number one choice for General Admission seating.

It has a linked, self-tipping design and can be adapted to suit a variety of seat centre sizes. Optional plastic arms can be added.

Available in a range of attractive standard colours including: Blue, Green, Yellow, White, Black and Red. Additional colours of your choice are available subject to quantity - contact us for more details.

For indoor use you can choose Crib 5 level fire retardant seats. The strong steel leg frames can be painted in a wide variety of matching or contrasting colours – either with or without galvanisation for additional weather proofing.

Plastic bushes and sleeves prevent metal to metal contact for ease of use and longer life. The leg frames can be fitted to either the terrace risers or treads and will be designed and custom made to match individual needs.
